DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20 and 24, drawn to a theft prevention system for an automobile, classified in class 340, subclass 426.13.
 - II. Claims 21-23, drawn to an expansion permission for air bag, classified in class 280, subclass 735.
2. Inventions 1 and 2 are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention 1 has separate utility such as a theft prevention system not required in group II; and invention 2 has separate utility such as an expansion emission for air bag not required in group I. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).
